DETAILED ACTION

Response to Amendment

Applicant amendment submitted on 12/07/2009 after notice of allowance has been entered. The amendment for claim 9 is being accepted by the Examiner.

Allowable Subject Matter

1. Claims 8-15 are allowed.

The following is an examiner's statement of reasons for allowance: The following is a statement of reasons for the indication of allowable subject matter: After reviewing the remarks made by the Applicant in response to the non-final office action the Examiner finds the remarks to be persuasive. The most pertinent prior art is Rutt (EP 0447080) and Claus et al (US 7,133,067). Rutt discloses a reconnaissance device comprising, an elongated body having a flight-arresting device at one end, an image-forming device at the other and a telemetry package in the central part of the body of the device. Preferably the device is interchangeable with a standard mortar bomb. Claus teaches a high-precision digital image stabilization of an image recording with a CCD sensor utilized in a moving or flying carrier. For the digital image stabilization, the movements of the carrier are detected with the aid of an inertial sensor and stored. Then, a correction of the image data is carried out based on the detected movements. Neither Rutt nor Claus discloses:

taking with said apparatus , during each revolution of the rotation of said flying body about said longitudinal axis, several pictures of said scene each corresponding to a predetermined angular position of said flying body about said longitudinal axis , so

that contours of said pictures are inclined in mutually differing manners and so that, in each picture, the image of said scene and said contour occupy a relative position which depends on said corresponding predetermined angular position of said flying body and which is different from that of the other pictures; determining among said pictures, a reference picture in which said relative position between the image of the scene and the contour is considered to be a relative reference position; applying in each picture, other than the reference picture a geometrical image transformation processing to the image of said scene so that the relative position of the transformed image of said scene with respect to the contour is similar to said relative reference position; and

displaying said reference picture and said pictures having undergone said geometrical image transformation processing are displayed successively on said display , wherein :

the rotation of the flying body is initiated at the moment of its launching.

The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
